Optimizing Last-Mile Delivery Logistics for Businesses

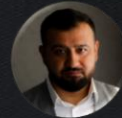

Company Description

Fleetroot is a SaaS IoT and logistics platform purpose-built for healthcare logistics. From managing medical fleets and critical last-mile pharma deliveries to ensuring compliance and real-time visibility, Fleetroot enables hospitals, pharmacies, and distributors to optimize operations, cut costs, and deliver essential supplies safely and on time — all through a scalable, cloud-based solution.

Key use cases include:

- **Pharma & Medical Deliveries with IoT:** Real-time tracking, temperature monitoring, and compliance checks to ensure the safety, integrity, and timely delivery of pharmaceuticals and medical supplies.
- **Unified Delivery & Dispatch Platform:** End-to-end visibility of orders, proof of delivery, and customer notifications
- **Multi-Sector Use Cases:** Custom workflows tailored for pharma, food, e-commerce, courier, and logistics.
- **Route Optimization & Dynamic Dispatch:** AI-powered route planning to save time, fuel, and reduce costs.
- **Telematics & AI-Driven Insights:** Predictive maintenance and data-driven decision-making — emphasizes efficiency, cost reduction, and tech sophistication
- **Workflow Automation & Driver Behavior:** Automated alerts, dashboards, and driver monitoring for safer, smoother operations.
- **Smart Sensor Monitoring & Fuel Management:** Sensor-driven safety alerts and fuel tracking to cut waste and boost efficiency.

Key People

Javokhir Vapaev
 Co-Founder

Javokhir has over 10 years of international experience in SaaS, PaaS, IoT, and tech distribution. As COO and Sales Director at Fleetroot, he drives strategy, operations, and growth, delivering cloud-based solutions for last-mile delivery and fleet management.
