

THE LITERACY LAB

THE CHALLENGE

Children with disabilities in inclusive education are still falling behind due to a lack of accessible tools that enable them to keep pace with their peers, resulting in minimal learning outcomes despite integration and requiring additional support to bridge the gap.

THE OPPORTUNITY

That's why we created the **Literacy Lab**.

A dedicated space where students receive the additional support they need, from basic literacy to essential skills, ensuring they are prepared to learn within the same curriculum as their peers and truly thrive in inclusive education.

THE IMPACT DRIVERS

KEY-X

The world's most awarded keyboard and mouse for people with disabilities

EXPRESSIA

Learning platform with personalized activities for assessment, therapy, STEM, language, and communication –gamified with Key-X for engagement and progress tracking.

COLIBRI

Bluetooth head motion sensor for hands-free control of devices, fully customizable for users with limited hand mobility.

SUCCESS STORIES

From students who couldn't recognize letters or colors to those now learning new languages and using government platforms.

Teachers create tailored tasks to track progress, and with Key2Enable's adaptive accessories, students like Rashid are even writing with their feet, proving that every challenge can be overcome with the right tools.
